As of January 1, 2016 all private sewage disposal systems in Benton County must be installed by contractors that are certified installers of Onsite Wastewater Systems with the National Environmental Health Association and the Iowa Onsite Wastewater Association (IOWWA). In addition to this requirement, these contractors must be in the business of installing private onsite septic systems and must have submitted a certificate of liability insurance that shows that the contractor is covered for the acts of installing septic systems. Benton County Department of Environmental Health determines whether the contractor is approved.
